**III. DETAILED ACTION**

Claims 1-21 are presented for examination and are pending.

*In response to Applicants remarks, all previous presented rejections of the claims are hereby withdrawn as to being moot.*

**Drawings**

The Examiner contends that the drawings submitted on February 27, 2006 are acceptable for examination proceedings, only. The drawings are difficult to read, expecially A2, B3, B4 and C4.

*See new office action below:*

**Claim Rejections - 35 USC . 101**

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

Claims 1-21 are rejected under 35 U.S.C. 101 because the claims are directed to a non-statutory subject matter, specifically, the claims are not directed towards the final result that is "useful, tangible and concrete.

(See State Street, 149 F.3d at 1373-74 USPQ2d at 1601-02).

According to the New Guidelines of October 26, 2005, which states that "A claim limited to a machine or manufacture, which

Art Unit: 2165

has a practical application, is statutory. In most cases a claim to a specific machine or manufacture will have a practical application. See Alappat, 33 F.3d at 1544, 31 USPQ2d at 1557)... a specific machine to produce a useful, concrete, and tangible result and State Street, 149 F.3d at 1373-74 USPQ2d at 1601-02).

Examiner requests Applicant to include in Applicants claimed limitations (in all the claims) the following:

What is the practical application?

What is the result?

What is final result that is concrete, useful and tangible?

Because the "practical application, result, concrete, useful and tangible" limitations are not claimed in Applicant's claims, Examiner believes that the above listed claims are nonstatutory.

Claim 21 are rejected under 35 U.S.C. 101 because the claims are directed to a non-statutory subject matter, specifically, directed towards "computer-readable medium".

Did Applicant intend for the claimed, computer-readable medium, to read as "computer-readable storage medium"? Further clarification is required.

"The term "computer-readable medium" as used herein, refers to any medium that provides information or is usable by the processor. Such medium can take many forms including but not limited to non-volatile and volatile, and transmission media... . Transmission media can take the form of carrier waves, i.e. electromagnetic waves that can be e modulated, as in frequency, amplitude, or phase, to transmit information signals. Additionally, transmission media can take the form of acoustic or light waves, such as those generated during radio wave and infrared data communications".
